

NAAN MUDHALVAN

**Project Title: Script-Controlled ACL - Restrict Record AccessBased
on Field Value**

Team ID: SWTID-2026-9038

Team size: 4

Team Leader Name: Kumutha K

Team Member: Siva Dharshini R, Jasmin M, Vayshvani S

Milestone 2: Table Creation

Activity: Creation of Tables

- In the Application Navigator, search for System Definition → Tables.
- Click New and create a custom table with the following details
- Label: Institution Details
- Name: u_institution_details
- Extends for : false
- Save or Submit the for

Table
institution Details

[Delete](#)
[Update](#)
[Delete All Records](#)

A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table. Applications use tables and records to manage data and processes. [More Info](#)

* Label

* Name

Application

Remote Table

- In the columns tab, user Insert a New row method to create the mentioned fields as shown below picture
- The following fields to the u_institution_details table
- Student Roll Number– Auto Number
- Student Name – Reference- User
