

## Ideation Phase

### Define the Problem Statements

|               |                                                                     |
|---------------|---------------------------------------------------------------------|
| Date          | 28 September 2026                                                   |
| Team ID       | SWTID-2026-9038                                                     |
| Project Name  | Script-Controlled ACL – Restrict Record Access Based on Field Value |
| Maximum Marks | 2 Marks                                                             |

Team Leader: K. Kumutha | Members: R. Siva Dharshini, S. Vayshavi, M. Jasmin

#### Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

|                            |                                                                                                |                                                                             |
|----------------------------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| <b>I am</b>                | Describe customer with 3-4 key characteristics - who are they?                                 | Describe the customer and their attributes here                             |
| <b>I'm trying to</b>       | List their outcome or "job" the care about - what are they trying to achieve?                  | List the thing they are trying to achieve here                              |
| <b>but</b>                 | Describe what problems or barriers stand in the way - what bothers them most?                  | Describe the problems or barriers that get in the way here                  |
| <b>because</b>             | Enter the "root cause" of why the problem or barrier exists - what needs to be solved?         | Describe the reason the problems or barriers exist                          |
| <b>which makes me feel</b> | Describe the emotions from the customer's point of view - how does it impact them emotionally? | Describe the emotions the result from experiencing the problems or barriers |

#### Example:

|                              |                                             |                                      |                                                 |                            |
|------------------------------|---------------------------------------------|--------------------------------------|-------------------------------------------------|----------------------------|
| <b>I am</b>                  | <b>I'm trying to</b>                        | <b>But</b>                           | <b>Because</b>                                  | <b>Which makes me feel</b> |
| an institution administrator | restrict record access based on field value | any user can open restricted records | no script-controlled ACL checks the field value | Worried                    |

## Problem Statements for the Project

| Problem Statement (PS) | I am (Customer)                                                     | I'm trying to                                                                            | But                                                                            | Because                                                                               | Which makes me feel                                      |
|------------------------|---------------------------------------------------------------------|------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|----------------------------------------------------------|
| PS-1                   | An institution administrator managing records in ServiceNow         | Ensure that each institution record is visible and editable only by the authorised roles | Any user with basic access can open and read records that should be restricted | No script-controlled ACL checks the field value of the record before granting access  | Worried and concerned about data security and privacy    |
| PS-2                   | A staff member (bb1-bb4 role user) working with institution details | View and update only the records that match my role and the record's field value         | I can either see records I should not, or I am blocked from records I need     | Access rules depend only on static roles and do not evaluate the record's field value | Frustrated and confused about why access is inconsistent |
