

# Project Development Phase

## Model Performance Test

|               |                                                                     |
|---------------|---------------------------------------------------------------------|
| Date          | 28 September 2026                                                   |
| Team ID       | SWTID-2026-9038                                                     |
| Project Name  | Script-Controlled ACL - Restrict Record Access Based on Field Value |
| Maximum Marks | 100                                                                 |

**Model Performance Testing:**

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter                   | Screenshot / Values                                                                                                                                                                                                                                                                                                                          |
|-------|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.    | Data Rendered               | <ul style="list-style-type: none"><li>Record Access Audit Logs Data Loaded (10,000+ Records)</li><li>Security Roles &amp; Field-Level Access Privilege Mapping Table</li><li>ACL Execution Latency &amp; Authorization Outcomes Data</li></ul> <p>[ Insert Dashboard Data View Screenshot ]</p>                                              |
| 2.    | Data Preprocessing          | <ul style="list-style-type: none"><li>Cleaned null values in Field_Value and Access_Granted columns</li><li>Parsed timestamp fields for evaluation latency tracking</li><li>Created custom conditional columns mapping user role privileges to specific field values</li></ul> <p>[ Insert Power Query / Data Preprocessing Screenshot ]</p> |
| 3.    | Utilization of Data Filters | <ul style="list-style-type: none"><li>Slicers applied for User Role, Target Field Name, Field Value Condition, and</li></ul>                                                                                                                                                                                                                 |

|    |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
