

Project Development Phase

Performance Test

Date	28 September 2026
Team ID	SWTID-2026-9038
Project Name	Script-Controlled ACL - Restrict Record Access Based on Field Value
Maximum Marks	100

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	- Record Access Log Dataset Loaded (Audit Trail Data) - Security User Groups & Role Hierarchy Mapping Table - ACL Field Value Condition Matrix Data [Insert Data Source / Tableau Workspace Screenshot]
2.	Data Preprocessing	- Data cleaning & null value removal for user permissions and field values - Data type casting for evaluation timestamp logging - Custom joins created between User Roles and Script Execution Outcome tables [Insert Tableau Data Prep Screenshot]
3.	Utilization of Filters	- User Role Filter (Admin, Manager, Standard User) - Field Condition Slicer ('Confidential',

		'Restricted', 'Public') • Execution Result Slicer (Access Granted vs. Access Denied) • Date & Latency Range Filters [Insert Tableau Filters Screenshot]
4.	Calculation fields Used	• Access Grant Rate: COUNT(IF [Access Status] = 'Granted' THEN [Record ID] END) / COUNT([Record ID]) • Dynamic Restriction Logic: IF [Field Value] = 'Confidential' AND [User Level] < 3 THEN 'Restrict Access' ELSE 'Allow Access' END • Avg Script Evaluation Latency: AVG([Execution Latency (ms)]) [Insert Calculated Fields Screenshot]
5.	Dashboard design	No of Visualizations / Graphs - 6 • Access Denial vs Grant KPI Cards • Access Evaluation Latency Bar Chart • Restricted Field Value Heatmap • Role-Based Access Distribution Pie Chart [Insert Dashboard View Screenshot]
6.	Story Design	No of Visualizations / Graphs - 5 • Story Point 1: Overview of Script-Controlled ACL Execution • Story Point 2: Security Breach / Access Denial Attempt Trends • Story Point 3: Field-Level Restriction Impact Assessment [Insert Tableau Story View Screenshot]
